

Relocation and Settlement Journey Map

The Relocation and Settlement Journey Map is a visual guide of the general requirements and personal needs of international workers and partners moving and settling in Norway. This visual guide contains links to information websites in the categories divided into priorities with a full list of links, and a checklist.

When to use this Journey Map

Use this Journey Map if you are an international worker or partner relocating and settling in Rana Municipality in Norway. You will find the overview of the interactive links to websites providing information and guidance in the process in the digital version. Use the official checklist if you need it in the process.

How to understand this Journey Map

This Journey Map is inspired by the world phenomenon board game *Snakes and Ladders* where you will find ladders and snakes but with a rare plot twist in the game. Start from the top by rolling the dice and move through the categories of priorities down to the bottom of the map. Just like the original game you will find snakes and ladders in the different positions based on priorities leading up to the requirements. When landing on a ladder, move back up most likely because you have missed an essential requirement. You can move down when landing on a snake, leading you to the next steps. This allows you to move forward on the map. Don't let your personal needs triumph over general requirements in the journey!
